

SCHEDULED MAINTENANCE PROGRAM

SM PROGRAM

THE HOTSY 24-POINT PERFORMANCE PLAN

Keep your pressure washer running like new with Hotsy's 24-Point Performance Plan — designed to prevent breakdowns and extend equipment life with scheduled maintenance and expert inspections.

We've got plans tailored to your equipment and usage, built to keep everything running up to spec, all the time.

From oil changes and belt checks to nozzle replacements and leak inspections, our techs cover it all — so your machine stays ready when you are.

24-POINT INSPECTION CHECKLIST

- o Check pump pressure
- o Check pump volume
- o Check and change pump crankcase oil
- o Check belt tension
- o Check pump oil seals
- o Check amp draw
- o Check unloader valve
- o Check pressure switch
- o Inspect electrical switches, controls and safety devices
- o Adjust burner for best combustion
- o Check fuel filters
- o Check fuel contamination
- o Check coil for scaling
- o Check coil for sooting
- o Check thermostat (temperature and proper cycling)
- o Check pressure relief valve
- o Check nozzle for wear, restriction and proper pattern
- o Check gun, wand and grips for wear or damage
- o Check hoses
- o Inspect quick couplers
- o Check detergent inlet system (screens and orifice)
- o Check detergent supply, metering valves and dilution ratios
- o Check engine crankcase oil, spark plugs and fuel filter
- o Offer operating training
